

RoHS Policy

RAMI Technology (Raltron) is fully committed to meeting the requirements of EU Directive 2011/65/EU RoHS Recast (RoHS2) and its subsequent amendments.

All Raltron products meet Directive 2011/65/EU which restricts the use of six substances in electrical and electronic products: Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent chromium (Cr VI), Polybrominated biphenyls (PBBs) and Polybrominated diphenyl ethers (PBDEs).

The additional restrictions of the EU Commission Directive 2015/863/EU adds 4 phthalates (DEHP, BBP, DBP and DIBP) to the RoHS list. With these new additions to the RoHS substance list RoHS is now commonly referred to RoHS 3.

The following table lists the restricted materials and their respective allowable limits:

RoHS 3 Restricted Substance	Threshold Level (at homogenous material level)
Cadmium (Cd)	0.01% or 100ppm
Hexavalent Chromium (Cr ⁺⁶)	0.1% or 1000ppm
Lead (Pb)	0.1% or 1000ppm
Mercury (Hg)	0.1% or 1000ppm
Polybrominated Biphenyl (PBB)	0.1% or 1000ppm
Polybrominated Diphenyl Ether (PBDE)	0.1% or 1000ppm
Bis(2-Ethylhexyl) phthalate (DEHP)	0.1% or 1000ppm
Benzyl butyl phthalate (BBP)	0.1% or 1000ppm
Dibutyl phthalate (DBP)	0.1% or 1000ppm
Diisobutyl phthalate (DIBP)	0.1% or 1000ppm

Raltron actively provides our customers with appropriate information which we receive from our suppliers. Raltron monitors and complies with all requirements of RoHS and specifically requirements resulting from the Restricted Substance List and informs customers if any changes take place.
