

**NEW 9 x 7 mm OVEN CONTROLLED
CRYSTAL OSCILLATOR NOW AVAILABLE!**

FOR IMMEDIATE RELEASE

Miami FL, November 1, 2018-Raltron Electronics Corporation, global leader in high performance frequency control devices, announced today the availability of its new 9 mm x 7 mm SMD Oven Controlled Crystal Oscillators OX7000 series.

OX7000 series has a frequency range from 19.200 MHz to 40.000 MHz with power supply voltage 3.3 V at 150 mA steady state. In parallel with its outstanding small size of 9 mm x 7 mm the OCXO frequency stability is ± 10 ppb over an operating temperature range -40° C to $+85^{\circ}$ C.

Additionally, the OX7000 series offers a quick warm-up time of 3 minutes, a low phase noise of -152 dBc/Hz at 10kHz offset and HCMOS output levels. The OX7000 series is RoHS compatible.

Due to its very small size and superior temperature stability this OCXO is suited for applications such as wireless infrastructure, transmission, precision instrumentation, broadcasting, and utility metering infrastructure, etc.

For samples, detailed specifications, price and delivery quotations, please contact Raltron at their US Headquarters, or any authorized Raltron Representative and Distributor.
