Raltron Electronics Joins Sigfox Partner Network

MIAMI – September 10, 2019 -- Raltron Electronics Corporation, a global leader in high performance frequency management products, is now a member of the Sigfox Partner Network. The fast growing ecosystem helps companies find the optimum solution for their specific IoT deployment use case.

SigFox is a narrowband cellular based wireless communications that has been developed to provide connectivity for M2M and IoT devices. The wireless interface offers long range data transmission and low power consumption for applications with lower data throughput requirements.

Raltron offers a wide range of antennas, crystals, TCXOs, filters and RF cable assemblies tailored to meet the requirements of Sigfox applications. Raltron also provides substantial design help including customization and circuit matching for antenna and oscillators.

“Many different elements impact the quality of Sigfox connectivity, however, the device antenna is the only component that can significantly reduce the link budget,” said Ross Weiss, VP Sales and Marketing at Raltron. “The Raltron Sigfox antenna offering includes more than 20 antennas to chose from to help engineers simplify the design, development and implementation of IoT and M2M use cases.”

About Raltron

Founded in 1983, Raltron Electronics Corp. is a privately held ISO-9001:2015 certified company that develops, manufactures, markets and sells worldwide, a large variety of frequency management products including timing crystals, crystal oscillators, VCO's, VCXOs, TCXOs, OCXOs, filters, ceramic resonators and a variety of antennas, cables and connectors. Its products are marketed through a worldwide network of independently owned representatives and franchised distributors.

Raltron Electronics Corporation is one of the most recognized and experienced manufacturers of frequency management products in the world. From simple tuning fork crystals to high stability oven controlled crystal oscillators, Raltron offers the most comprehensive line of frequency management devices in the industry. The company's commitment to research and development enables the continued development of innovative antennas, crystal devices, LTCC filters, oscillators, SAW devices and more. Raltron is dedicated to continuous growth through

investing in its traditional markets like automotive, consumer, industrial and medical, as well as new markets including IoT, M2M and smart metering. Raltron products are distributed by global distributors, prominent catalog houses and regional distributors addressing specific marketplaces.
